

I ZODE IMPACT TESTERS-CHARPY IMPACT TESTER

The resistance to breakage by flexural shock of plastics and Electrical insulating materials as indicated by the energy extracted from standardized pendulum type hammers mounted on standardized machines in breaking standard specimens with pendulum swing. The energy absorbed per unit of specimen width is reported in joules.

SPECIFICATION

Fully digital display (LCD) of angle and energy in joules Range change by selector switch. Interchangeability of impact hammers is very easy.

Max. Available energy - 21.68 Joules

Ranges - 0-2.71 J 0-5.42 J
0-10.84 J 0-21.68 J
